

AMENDMENTS TO THE SPECIFICATION

Pursuant to 37 C.F.R. § 1.125, Applicant hereby submits the attached **Substitute Specification**, including (i) a clean version and (ii) a separate marked-up version showing the changes in the specification relative to the previous version. The substitute specification contains no new matter.

Please replace the Abstract of the Disclosure with the following:

A folded box (10) ~~having~~ has side walls (12, 14, 16) and a base unit (60) and/or a lid unit, (70), ~~at~~ At least one ~~of the~~ side walls (12, 14, 16) ~~having~~ has a convex curvature when the folded box (10) is folded up, ~~is characterized in that~~ at At least one supporting unit (20; 50) is connected to the inner wall of the convexly curved side wall (12, 14, 16) and has a first adhesive tab (22) and a second adhesive tab (24), which are connected to the inner wall and which are arranged spaced apart (A1; A2) from each other in the direction of the curvature, ~~and between~~ Between the first and second adhesive tab (22, 24) there is a supporting tab (30; 56), which is connected to the first and, ~~respectively,~~ the second adhesive tab (22, 24) via a first and, ~~respectively,~~ a second supporting tab fold (32, 34), ~~respectively.~~ the The length of the supporting tab (30; 56) ~~corresponding~~ corresponds to the distance (A1; A2) between the first and the second adhesive tab, (22, 24) ~~and, when~~ When the ~~folded~~ box (10) is folded up, ~~it being possible for~~ the supporting tab can (30; 56) ~~to be folded into~~ the interior of the folded box (10) or, ~~when the folded box (10) is folded up, folding~~ folded up automatically into the interior of the folded box (10).
